WELCOME MESSAGE

Welcome to PISC 2026!

It is with great pleasure that we announce the launch of the 7th edition of the Paris International Shoulder Course (PISC) 2026. This year, we are excited to return to our historic venue, the Marriott Rive Gauche, where we look forward to welcoming you in great numbers.

PISC has established itself as the world's leading event dedicated to cutting-edge developments, innovations, and best practices in shoulder replacement surgery. Year after year, our goal remains unchanged: to provide a high-level educational experience for all attendees, from junior trainees to seasoned experts, by combining fundamental knowledge with hands-on practical skills.

We are delighted to once again host the Pre-Course, offering sponsors a unique opportunity to showcase their latest innovations to a highly engaged audience of shoulder surgeons. This dedicated session will allow industry leaders to present new technologies, discuss advancements, and interact directly with participants eager to stay at the forefront of their field.

Throughout PISC 2026, sponsors will have the opportunity to engage in live surgeries, interactive workshops, and networking sessions, all designed to foster knowledge exchange and meaningful collaborations. A special focus will be placed on digital innovations in pre-operative planning, navigation, artificial intelligence, and robotics, paving the way for the future of shoulder arthroplasty.

Don't miss this chance to connect with an international audience and be part of a dynamic event shaping the future of shoulder surgery.

We look forward to seeing you in Paris for PISC 2026 and sincerely thank you for your continued support!
